HOW TO USE - 3 EASY STEPS

Step 1

The Sectioning

Using the Handle (pointed end) Section your hair where you need **VOLUME!**

Step 2

The Volumizing/Teasing

Hold the sectioned Hair firmly and using the **POSITIVE** charged volume side of the Brush (Black and White Bristles) push the Brush down a few times from the ends to the roots to create a Volumed Teased look (don't stress it does look weird but not for long!)

Step 3

The Smoothing

Now using the other side of the Brush – (white bristles) gently smooth over the volumed/Teased section to smooth and shape your hair to your desired look. By using the **NEGATIVE** charge you are smoothing and promoting Shine without snagging, leaving the volume you created intact.

Repeat Step 1 – 3 on your hair until you are happy with your style!
